

The Alberta Native Plant Council publishes this source list out of concern for maintaining the biological diversity in our province. We want to support and promote the use of native Alberta plants for environmental restoration and for the landscape and garden where appropriate. We hope that as people become increasingly familiar with these plants they will also come to appreciate them and work to protect the ecosystems where they, and we, live.

The Council's aim is to increase knowledge of Alberta's wild flora and to preserve it for present and future generations.

The Alberta Native Plant Council also publishes a series of guidelines that deal with the collection, purchase and use of native plants. These guidelines are the result of extensive consultation with professionals in the areas of conservation, reclamation, and plant production. Both the source list and the guidelines will assist you in choosing the type and source of plant material appropriate to your needs and in keeping with the preservation of native ecosystems and individual species. For additional ANPC guidelines and other references, please visit the Publications webpage of the ANPC's website ([www.anpc.ab.ca](http://www.anpc.ab.ca)).

If you have comments on or additions to the Source List please contact the ANPC at [info@anpc.ab.ca](mailto:info@anpc.ab.ca).

This list is provided by the Alberta Native Plant Council as a public service; it is not an endorsement of the organizations named herein or their products or services.
